RESET CHART

STEP 6:

Press reset chart to redraw.

Note: Be careful when pressing to avoid mistakes, as it takes a lot of time to re-enter data.

Some notes:

First, the website cannot support input of more than 10 data types. If you need more than 10 types, you will need to create multiple charts.

GUIDE TO USING THE CHART

Second, please note that when entering data, each X and Y value should be separated by a space, and avoid using the comma (900.000 not 900,000).
